Innovative Solutions for Your Critical Cleaning

Modular Bucket and Storage Solutions

for the Multi Bucket Systems Below

The **M-Zone® Storage Cart** reduces the footprint of the double bucket systems by half for storage.

Mop Handle Cart

Bucket Systems

The **BucketBinder™ Multi Bucket System** is a cost efficient, ergonomic and simple multi bucket system

C-7 Cart shown with MegaWringer™

Color-coded brushes are versatile for aggressive or fine equipment cleaning in the lab and in production

Bottle Brushes

Bottle Brushes have rounded soft or medium stiff bristles for small containers and surface cleaning. Valve brushes have larger diameter oval shaped brush heads.

Bottle Brushes

Plastic Brush Heads attach to threaded handles for cleaning small tanks, carboys, duct work, and other equipment. Cylinder brush is dome shaped, Kettle brush is oblong.

Color Coding Products

Plastic Handles

Micronova Plastic Handles in fixed or extended lengths with color coded grips can be used with Flex Brushes and Plastic Brush Heads.

Handle grips available in four colors: Yellow (YE), White (WH), Red (RE), and Blue (DB)

Slim T™ Buckets

Rectangular, 6 gallon buckets with a 19-inch interior width, an ideal choice to use with flat head or string mops, are available with or without autoclavable casters.

With casters, use as a single bucket system, or as replacements in BucketBinder™ Multi Bucket Systems.

Without casters, buckets are for stand alone use or as replacements for the Slim T™ and SlimLine™ cart systems.

Tapes

Cleanroom tapes with plastic cores for color coding and sealing, along with safety and autoclave indicator tapes are ideal for space and equipment identification.

Squeegees

Durable construction for wet areas

Disposal and Removal for Waste LDPE Liners and Bags

BinLiners

Liners are available in various configurations and are used for:

- transfer raw material
- product storage
- garment collection
- material disposal

Pictured to the right is a stainless steel binstand used with liners

Biohazard Bags

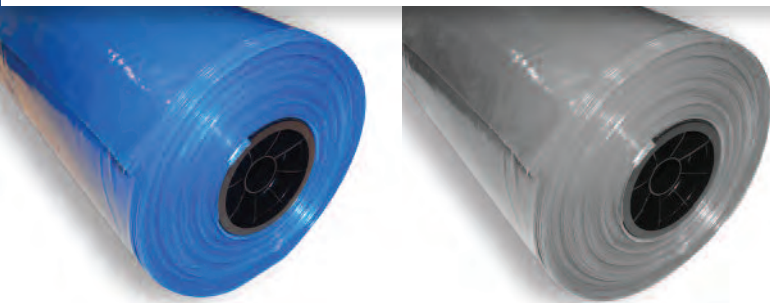

Gamma Irradiated Biohazard bags are ideal for disposal of:

- pipettes
- swabs
- rodac plate test samples
- medical and infectious waste
- hazardous drugs

BinLiners Roll Cart

The **BinLiners** Roll Cart is a durable heavy duty cart for transporting BinLiners on rolls. The cart will hold two rolls of any size including the 40 x 60 in (120 x 150 cm) size.

Tinted BinLiners

Tinted **BinLiners** are designed for sorting waste in the production area. Available in blue and grey tint, in 3-mil, 40 x 60 in (120 x 150 cm) standard. Other sizes upon request.
