

Soaps & Sanitizers

MicroDispenser™

A compact, gravity-fed, touch free dispensing unit with no tubes or pump assembly. The MicroDispenser effectively reduces the risk of cross-contamination and waste in the cleanroom and supporting areas. The dispenser delivers a consistent, pre-measured dose of soap or sanitizer into the palm of the hand cleanly, safely and economically.

The MicroDispenser is activated by an electronic eye, dispensing a predetermined amount of liquid when the infrared beam is interrupted by a hand or wiper. The unit operates on four "AA" size batteries.
