

BucketBinders™

Multi Bucket Systems

The Micronova **BucketBinder™** Multi Bucket Systems are a cost efficient, ergonomic – and simple – multi bucket system that does away with the need for bulky carts and frames. The kit includes 2 or 3 polypropylene buckets with casters and one or two sets of bucket binders™ (bucket connectors). The system offers easier cleaning and storage – in both small and large controlled environments and the sterile core.

- Polyketone 'hooks' firmly secure two or three rectangular buckets together allowing scale-up or down as required.
- Easy clip action allows attachment before or after buckets are filled with disinfectant.
- Bucket liners are easily replaced without completely removing BucketBinders™.
- Sturdy enough to secure two or three buckets - with up to 15 litres in each.
- Lightweight – less than 2 lbs per pair – disinfectants and can be autoclaved and gamma irradiated.
- Once connected, easily houses the W-9 W-92 flat wringers, W-9B BoxWringer™ for string mops or W-94 positive pressure flat mop MegaWringer™ wringer.
- Perfectly complements all the Micronova MZone™ FlatMops™, SnapMops™ and SlimLine™ mops.
- BucketBinders™ fit the B-7AC series rectangular buckets.

Double Bucket Kits:

One set of BucketBinders™ and 2 buckets:

- BB-DBL-DBYE, Blue and Yellow buckets
- BB-DBL-DGRE, Green and Red buckets
- BB-DBL-DBDG, Blue and Green buckets
- BB-DBL-DBRE, Blue and Red buckets

Triple Bucket Kit:

Two sets of BucketBinders™ and 3 buckets:

- BB-TR-DBREYE, Blue, Red and Yellow Buckets

Specifications:

Materials of Construction:
