

Micronova[®]

MANUFACTURING INC.

Your strategic supplier for critical cleaning

BUCKETS, CARTS, AND WRINGERS
FOR EFFICIENT CLEANING

Excellence in cleaning since 1984

Critical cleaning relies heavily on the use of the correct tools. Micronova's variety of carts with multiple bucket configurations ensures proper disinfectant and detergent application while allowing for increased clean rinse options. Designed for controlled environments: Pharmaceutical Manufacturing, Compounding Pharmacies, Semiconductors, and other critical industries.

Multi Bucket Systems

C-7 Cart shown with MegaWringer™

BucketBinder™ Multi Bucket System

The **BucketBinder™ Multi Bucket System** is a cost efficient, ergonomic and simple multi bucket system that does away with the need for bulky carts and frames. The system easily disassembles and offers easier cleaning and storage – in both small and large controlled environments, including the sterile core. Autoclavable.

BucketBinders

BB-DBL-DBDG

Slim T™ Double Bucket System

Simple and effective, the **Slim T™ Double Bucket System** is easy to use, maneuver and store. The electropolished stainless steel frame secures and easily transports the buckets with excellent maneuverability.

Available with 6-gallon molded polypropylene or 8-gallon molded stainless steel buckets. Stainless Steel system includes brake feature.

The kit includes two or three polypropylene buckets with casters and one or two sets of BucketBinders (bucket connectors).

BB-TR-DBREYE

C-92 cart includes two B-99 buckets. Shown with W-92 Wringer

SlimLine™ Cart System

An electropolished stainless steel cart with polypropylene or stainless steel buckets. The three 'grip-it' holders on the back of the cart allow for an easy inter-change and storage of handles and additional mop heads. The angled handle allows for easy handling in the cleanroom.

Slim T™ Wringers

The **Slim T™ Wringers** are electropolished stainless steel sieve style wringers designed for use with flat head, tube and sponge mops, including Micronova SnapMop™, PadMop™, PocketMop™, SlimLine™, SlideMop™, FlatMop™, T-Mop™, Slim T™ Mop and PowerHead™ Mop series.

The simple design eliminates excess liquid, leaving the mop damp enough to effectively sanitize or clean the surface.

W-9 (top right) Slim T Wringer

Use with flat head mops, T-Mops, & PowerHead Mops

W-92 (bottom right) Slim T Double Wringer

Use with flat head mops, including PadMops

Wringers

W-94
MegaWringer

MegaWringer™

MegaWringer™ Flat Head Mop Wringer is a unique electropolished stainless steel and polyketone flat head mop wringer that uses the leverage of the mop handle to exert downward wringing pressure.

Single Buckets

Slim T™ Buckets

Rectangular, 6 gallon buckets with a 19-inch interior width, an ideal choice for use with flat head or string mops, are available with or without autoclavable casters.

B-99

Stainless Steel rectangular 8-gallon buckets are replacements for the Slim T™ and SlimLine™ cart systems.

B-7REAC

With casters, use as a single bucket system, or as replacements in BucketBinder™ Multi Bucket Systems.

B-7DG

Without casters, buckets are for stand alone use or as replacements for the Slim T™ and SlimLine™ cart systems.

Buckets Designed for String Mops

A lightweight and ergonomically designed, plastic bucket system is ideal for efficient string mopping in controlled environments.

B-22DBACSS

Large Mouth single unit with stainless steel casters, compatible with the W-6 downpress wringer.

B-3

Durable Stainless Steel Bucket is compatible with W-6 wringer for an all electropolished stainless steel system.

Bucket Liners

The BucketLiner™, with a unique LDPE/Nylon laminate, is an ideal impermeable barrier material for lining totes to transport product parts, raw materials or to line buckets containing disinfectants or other cleaning solutions.

BKL99-3512IR for B-99 buckets

BKL7-3119IR for Slim T™ buckets
