

Small Tools for Small Spaces

An efficient and ergonomic sanitization process is made simpler with the Micronova family of Small Tools for Small Spaces, designed for controlled environments and critical laboratory spaces. These tools are ideal for supporting contamination control in Isolators, hoods, RABs, Biosafety Cabinets, pass throughs, and work spaces.

All mop covers and small tools are cleanroom compatible, ISO 5 to 9.

- Covers are available in multiple materials from smooth polyester to textured foam
- Use with interchangeable fixed and extended handles
- Washable and reusable
- Holds up to strong cleaning solutions and disinfectants
- Covers available gamma irradiated.
- Certificates and Lot Traceability with each cover and tool
- Autoclavable

The Micronova **Hand Held Mop** conforms to the hand, then smoothly glides over surfaces for a complete clean or sanitization.

- Polyketone version is very durable, autoclavable
- Polypropylene version is reusable and then recyclable
- Fits 6" FlatMops

Polyketone Hand Held Mop	HHT-06PK
Polypropylene Hand Held Mop	HHT-06PP
NovaPoly™ Flatmop Cover, no foam	MZSM6-6NS
